_____

I am Cloud Enthusiast and an experienced Field Service Engineer. My current job duties usually include inspecting and installing equipment and new technologies, directing crews or workers on site, conducting research, and reporting on project status. These years I have been focusing also on DevOps technologies and I believe that this is the right moment and chance to face the new challenges that this role is offering.

Cloud Experience

CURRENTLY LEARNING:

- Vagrant – Automatic installation of virtual machine, provisioning and server configuration, website setup, WordPress setup;
- AWS(Amazon Web Service) – Installing and configuring EC2 machines, creating Elastic Block Storage, creating EBS snapshots, Elastic Load Balancer, Cloudwatch, Auto Scaling Group.
- CI/CD tools(Jenkins) and Python
